## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. Claims 1-18 are presented for examination.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-10 and 12-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Chih, U.S. Patent 6,334,175 B1.
4. As to claims 1 and 12, Chih discloses a method and system allocating a portion of memory (bank), selectively coupling it, decoupling it, and reallocating it for a second range of addresses. See Abstract, Figs. 1a and 1b, col. 3 line 32 to col. 4 line 17, col. 4 lines 41-63, col. 5 lines 27-60, and col. 6 lines 4-15. Upon host request, the selector is seen to allocate banks when they are available and to couple them as recited, clearly these actions also include decoupling. A bank may be allocated for another application, and thus a second range of logical addresses.
5. As to claims 13 and 14, Chih discloses address decoder, command interface, and memory manager as recited since all functions thereby are disclosed as described in sections cited hereinabove.

6. As to claims 2-8 and 15, Chih discloses all limitations recited as described in the sections cited above, any number of portions are allocated, available space is determined and reserved/assigned.

7. As to claims 9 and 16, a pointer is returned and used since addresses are sent to the memory, further program data contains pointers.

8. As to claims 10 and 17, a last address is assigned in any number of cases, as for example when a last bank holds a last address, or when all memory space is allocated and deallocated.

***Allowable Subject Matter***

9. Claims 11 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
